

GLOBAL **FORUMS** MODULE OVERVIEW

INTUS
smartcities

INTUS Smartcities is setting out to change the way cities operate on a global scale. Through the use of proprietary resources, INTUS Smartcities solves infrastructure challenges and problems related to safety, efficiency, resource sustainability, environmental damage, and data.

SMART CONVERSATION GLOBAL FORUMS

The current interactive channels for cities and citizens are lacking in depth and effectiveness. There is currently no real on-demand way to communicate when it comes to solving issues and voicing opinions. With the current technological shift, there must be new ways in which communities, municipalities and citizens can communicate, problem solve and support. Without a way for effective communication, all stakeholders miss out on endless opportunities to increase efficiency, citizen satisfaction and safety.

Through the use of international online forums, municipalities and citizens can interact with one another in ways never before possible. These forums can be a place for discussion, problem solving, and sharing of experiences. The goal is to make the world more connected, which is why Smartpolis has created online forums to facilitate global discussion, increase collaboration and grow investment opportunities.

Smart Global Forums

A smart forum is one of the easiest ways for all users to connect. With increasing popularity of regular forums around the world, a smart global forum for actual governments and citizens is an excellent way to get involved and create conversation. These forums are focused on solving infrastructure problems, creating a virtual town-hall, solving problems related to crime, governance, and citizen participation, and even planning events.

GLOBAL CONNECTIVITY SMARTPOLIS SOLUTIONS

Smartpolis has created global forums for all cities, municipalities and citizens to use to better connect with one another. Through the use of Smartpolis' forums, municipalities will be able to discuss a wide variety of issues with other municipalities globally. Smartpolis has also designed the forums to facilitate citizen discussion as well. Citizens from around the world will be able to interact with municipalities and other citizens to share concerns, culture and much more.

Smartpolis' goal is to create a space for all users to come together and create a living digital community that translates into real-life. Smartpolis designed this with the goal of not only helping expedite problem solving, but to promote tourism, business development, and visibility for municipalities and communities around the globe.

KEY FEATURES

MUNICIPALITY-TO-MUNICIPALITY DISCUSSION

Municipalities can communicate with municipalities around the world to trouble-shoot and discuss infrastructure problems, investment opportunities, governance, policy, and much more.

CITIZEN-TO-MUNICIPALITY DISCUSSION

Citizens will have the ability to interact with municipalities in a digital town-hall to voice their opinions and concerns when it comes to their community. Citizens can discuss safety, government policy, concerns, troubleshoot, receive information and much more.

CITIZEN-TO-CITIZEN DISCUSSION

Citizens from around the world can connect with one another to discuss their communities and what is happening in them. Citizens can discuss events, culture, history, business and anything thing else that is of interest to these communities.
