“BOSS”

Business Objective Support System

*Digital Operations
Management*

Remote Monitoring

BOSS is An interactive web-based ERP (Enterprise Resource Management) and Business Management System, specifically designed for large scale operations. BOSS' key feature is that it creates visibility for top management of companies and Cities.

This visibility helps management make more informed decision while simultaneously reducing actual management overhead.

Rea-time Statistics

- *Information at Your Fingertips*
- *24/7 Monitoring*
- *Automated Alerts*
